

Student Health Insurance Program

The university has entered into an agreement with *Cultural Insurance Services International* to make available low-cost health insurance to international students and their families. All students who are F-1, J-1, or M-1 visa holders are eligible for this insurance program.

The policy coverage is extensive. Included are medical expenses, emergency room costs, hospitalization costs, x-ray services, laboratory fees, physiotherapy, ambulance transportation costs, and operating room charges. Students need only pay a deductible and all other covered medical costs are included.

The cost of the insurance is based on the age of the student and is very reasonable. As an example, the cost for a 30 year old student is only \$110 per month. Family coverage is similarly inexpensive.

The application process is simple. Forms may be completed on campus, and staff members are available to answer any questions you may have.
